Early Grade *	Open-ended Question	Comments from Student
0	Strengths and weaknesses instructor	Lots of work, but she is extremely helpful. Will go out of her way to help students no matter what. Very positive person overall. Most helpful teacher I've had yet. Weaknesses: A little hectic, expects a lot to be done in and out of class, overall the class will often fall short and she can seem discouraged. She plans a lot to do each day.. For 9am she is a little to energetic..
0	Strengths and weaknesses course	Course has too much work outside of class...
0	Strengths and weaknesses lab	She would start class as early as you arrived.. we would have these "Write Now's" to do when we arrived and it seemed unusual to have the "Write Now" due at 9:10, if the class is supposed to start at 9:10..
0	Strengths and weaknesses instructor	There was never enough time, class was always started about 10 min early and always let out exactly on time. The homework was overwhelming even when a paper was due the next day we still had a second or third assignment. Also, we had to print so much stuff out with every paper we turned in that I spent a fortune on ink and paper and that's not right when e-mail would work as well and she can't possibly read all of the stuff we turn in
0	Strengths and weaknesses course	It didn't really prepare me, I won't have to use humanities or social science writing in any of my classes and the last assignment just seems like it's filling time
0	Strengths and weaknesses instructor	Strengths: A willingness to always help students, really cared about students treated them like a person instead of just another passing number
0	Strengths and weaknesses course	The outlines, rough drafts, peer reviews, going through everything step by step in such detail really helped the learning process and being able to write more than just getting an A on the paper
0	Strengths and weaknesses lab	Ms. Vilhotti, I think I can safely say you've been the best English teacher I've ever had, and I've learned more from you in one semester than I have in four years of highschool including my AP classes. Thank you!
0	Strengths and weaknesses instructor	Overall I I have learned a lot from this course and teacher. Although there was a lot work assigned, I thought it was helpful in completing papers. Assignments could have been better explain in come cases, but if extra help was needed she was always willing to provide detailed explanations, examples, and individual help sessions. She was very flexible and understanding!:)
0	Strengths and weaknesses course	A lot of worked assigned in the process of witting papers (drafts,outlines,peer edits,etc) but in the end prove to be helpful.Overall very very good course, I especially liked having it first semester because it helped me with a lot of other papers in other classes.
0	Strengths and weaknesses lab	Thank you so much for being patient with me and always offering me extra help! I have improved not only in writing papers, but also in learning the steps it takes to complete a well-written paper.You are a great teacher..keep it up!:) Thank you!
0	Strengths and weaknesses instructor	overall there are no weaknessess but i feel the work load piles up sometimes.

Early Grade *	Open-ended Question	Comments from Student
0	Strengths and weaknesses course	the course teaches a lot about writing, and i feel there are no problems with it.
0	Strengths and weaknesses instructor	She was always prepared for class everyday and had a strict plan for the class to follow. But sometimes she was so strict on her plan that she did not give enough time for us to complete the original assignment. She had a great idea of time management though, she would give like 8 minutes to finish assignments. She had a tendency to push a lot of work for the projects in a little time slot. We would have a week where we had very little outside class work, and then the nwxt week we would have something due on most days. So the assignment weeks would be very tough. Overall she did a good job of teaching the disciplines.
0	Strengths and weaknesses course	There are too many projects i believe. There is a lot of writing involved and the rough drafts and peer reviews and projects and reading logs and reading assignments. So there was just a lot of stuff to do, and it was very frustrating at times!
0	Strengths and weaknesses instructor	Great instructor always enthusiastic about learning and the assignments. Very understanding of different situations and was always available if help was needed.
0	Strengths and weaknesses instructor	Ms. Vilhotti did a very good job of answering and responding quickly to questions and emails. She timed all of our classes which kept it organized but definitely made it feel a lot more rushed.
0	Strengths and weaknesses course	We did a lot of things with our papers like outlines, summaries, drafts and peer reviews. These were very helpful, but I always felt sligtly rushed and did not have enough time to really put enough effort into my paper.
0	Strengths and weaknesses lab	Overall the course was very excellent and I learned a lot more then I did in any of the four years in my highschool english classes. I have always despised english but this cass was really helpful and actually interested me which impressed me. Thank you.
0	Strengths and weaknesses instructor	Strength for Ms. Vilhotti would be her willingness to always help her students. She is very accessable and easy to approach.
0	Strengths and weaknesses instructor	I thought she was a great teacher and she knew what she was doing every day. She was great about e- mailing also.
0	Strengths and weaknesses course	The course was great, I learned alot and it was very structured.
0	Strengths and weaknesses instructor	I think Ms. Vilhotti was very nice and informative. She was a great instructor.

Early Grade *	Open-ended Question	Comments from Student
0	Strengths and weaknesses course	I think the course is sometimes too high paced for the incoming freshman to adjust to.
0	Strengths and weaknesses instructor	The instructor was very good! She was always enthusiastic about class, and she was always willing to help if you went to her for help. She made the class fun, but at the same time we learned alot.
0	Strengths and weaknesses course	The course itself was set up in a kind of interesting way. The first section seemed very long and like there was a ton of extra time, but as we got into the other sections everything seemed very rushed. Then inbetween the papers there was like a week were it seemed like we didnt do anything but then when it came to the time of doing the paper everything was really rushed, and it seemed like there was so much stuff to do not just the paper.
0	Strengths and weaknesses lab	This class was really good, and I really enjoyed it.
0	Strengths and weaknesses instructor	The instructor was ok.
0	Strengths and weaknesses course	I thought that because everything was always timed,the class seemed to be rushed.
0	Strengths and weaknesses lab	Overall, I did not like the class.
0	Strengths and weaknesses instructor	Ms. Vilhotti is an excellent teacher. Our class is well structured and we always know what is happening before/during each class. The only slightly negative aspect is that when projects are due, we have a solid week of a lot of homework.
0	Strengths and weaknesses course	This course is pretty dry, but Ms. Vilhotti manages to make what is normally an incredibly boring class much more interesting and creative.
0	Strengths and weaknesses lab	Definitely take Ms. Vilhotti!
0	Strengths and weaknesses instructor	She did a really good job of getting everyone invloved and focused in the activities we did in class. We did a lot of group work, which was much more interesting than individual reading. She was also really patient with all of us for so early in the morning and was willing to help with any problems/questions we had.
0	Strengths and weaknesses course	It was well organized and helped me improve on styles of writing i hadn't focused on in previous english classes.

Early Grade *	Open-ended Question	Comments from Student
0	Strengths and weaknesses instructor	The instructor was great. She taught us so much stuff about writing in the different disciplines.
0	Strengths and weaknesses course	The course was hard and time consuming. I had to write papers the whole time and whenever we were done with one, we started another one immediatley.
